

Mahanthesh S

Software Engineer | Java Backend Developer

+91 7892568479 | Bengaluru, Karnataka, India 560064 | mahantheshs61@gmail.com

SUMMARY:

Recent Information Science graduate and Backend Developer specializing in Java and Spring Boot. Experienced in designing and developing scalable RESTful APIs, optimizing database performance, and implementing secure authentication using JWT and Spring Security. Proficient in PostgreSQL and Hibernate/JPA, with exposure to microservices architecture and API performance optimization. Strong foundation in data structures, problem-solving, and Agile development practices.

EXPERIENCE:

Web development Intern Mindset IT Solution | Bengaluru Mar 2025 – Jun 2025

- Designed and developed scalable RESTful APIs using Spring Boot following layered architecture.
- Improved DB query efficiency by ~20% using indexing + optimized joins.
- Applied JWT-based authentication and role-based access control
- Integrated APIs with PostgreSQL using Hibernate/JPA and implemented validation + exception handling.
- Assisted in deployment and testing of backend services on cloud platforms.

SKILLS:

- **Programming Languages:** Java, Python
- **Tools & Platforms:** Git, GCP, VS Code, Vercel, Render, OpenAPI, Postman
- **Core Concepts:** DSA, Spring Security, JDBC, JWT Authentication, API Design, Microservices, Exception Handling, RESTful Services
- **Databases:** PostgreSQL, MySQL
- **Methodologies:** Agile, SDLC, Manual Testing, Unit Testing

PROJECTS:

Banking System Web Application | Java, Spring Boot, SQL | Jun 2024

- Built secure banking web app using Spring Boot REST APIs with role-based access.
- Executed secure authentication and validation mechanisms for transaction processing.
- Reduced API response time by 60% using async processing + query tuning.

Novel Reading platform | Spring boot, React, REST API | Feb 2026

- Implemented role-based access control using Spring Security and JWT authentication.
- Optimized database queries using indexing, pagination, and custom JPA queries for improved performance.
- Improved API response time by 30% using caching and query optimization.
- Designed workflow-based systems for chapter requests, approvals, and scheduled deletions with transactional consistency.
- Identified and resolved performance bottlenecks in APIs, improving response reliability.

CERTIFICATIONS:

- Google Cloud Skill Badge – Prompt Design in Vertex AI
- Oracle SQL Certification – SQL Basics
- The SecOps Group – Certified Network Security Practitioner (CNSP)

EDUCATION:

- B.E, Information Science & Engineering, BMSIT&M (2021-2025)
